

Modern Slavery Act Transparency Statement

We take a stand against human trafficking and Slavery. Our positions can be found in our [Code of Conduct](#), our [Business Ethics Policy](#) and our [Sustainability Policy](#).

We understand that the supply chain for coffee has many risks when it comes to, e.g., child labour or slavery. Our deep understanding is also why we primarily buy certified coffee from Fairtrade, UTZ and Rainforest Alliance.

We also manage the risks by purchasing our coffee directly from the producing countries with as few intermediaries as possible, often only one to three between us and the individual farmer. We work with long term relationships and have a systematic way of assessing new and evaluating current suppliers, both when it comes to coffee as well as other products we source.

Each year we report our progress and challenges connected to sustainable development. How we address those risks can be found in our Sustainability report. (page 30-31)

A handwritten signature in purple ink, appearing to read 'Lars Appelqvist', with a long horizontal stroke extending to the right.
